INSTITUTE NEWS

CEI selects new graduate fellows

CEI has selected 28 Ph.D. students for its 2019-2020 Graduate Fellowships. CEI funds students from departments across UW to explore new research directions in solar energy, energy storage, and systems integration. Fellows participate in cleantech networking events, industry field trips, lab tours, and K-12 outreach activities throughout the year.

Erin Jedlicka, a U.S. Navy veteran and recent CEI Education & Training Fellow, shares her passion for clean energy education in this CEI web feature.

[CEI & E8 begin third year of Torrance Tech Due Diligence Program](#)

Thanks to support from the Mark Torrance Foundation, CEI and cleantech angel investment group E8 have launched the third year of the Torrance Tech Due Diligence Program. This year, twelve clean energy Ph.D. students will gain professional experience as they apply their STEM training to serve as technical consultants on E8 due diligence teams.
